## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 37 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 37 recites the limitation "said longitudinal axis" in line 2. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16, 18-32, 36 and 37 are rejected under 35 U.S.C. 102(b) as being anticipated by US patent 3933377, Arrowood.

In regards to claims 1 and 36, Arrowood discloses a coupling device (9) to be supported by a supporting member (50) capable of being secured to a structure (51) above the coupling device, the supporting member comprising a stem (53) having a free end portion, the coupling device comprising an integral tubular member (10, 16, 17, 18, 31, 54) having opposed axially aligned ends, each of the ends adapted to receive one end of one of the pair of mating conduit (14, 15), and the tubular member having an

Art Unit: 3679

integral top surface (54) and an aperture through the top surface adapted to engage the free end portion of the stem of the supporting member.

In regards to claims 2 and 18, Arrowood discloses the top surface being raised relative to the exterior surface of the tubular member.

In regards to claims 3, 4, 19 and 20, Arrowood discloses the aperture being threaded internally and the stem of the supporting member being externally threaded matingly threaded at least at its free end for engaging into the internally threaded aperture.

In regards to claims 5-8 and 21-24, Arrowood discloses a lock nut (52) along the stem for locking the free end of the stem into the internally threaded aperture.

In regards to claims 9-16 and 25-32, Arrowood discloses a stop member (11) projecting internally at about the middle of the tubular member.

In regards to claim 37, Arrowood discloses the aperture being generally perpendicular to the longitudinal axis of the tubular member.

#### ***Allowable Subject Matter***

Claims 33-35, 38 and 39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

Applicant's arguments filed 9/5/02 have been fully considered but they are not persuasive. The applicant argues Arrowood utilizes multiple parts to couple two pipes and to hang the assembly to a supporting structure. The examiner agrees, because the

Art Unit: 3679

terms "comprising" and "comprising essentially" render the claim open for the inclusion of unspecified elements, the term "consisting of" closes the claim as to the inclusion of elements other than those recited in the claim, and the term "consisting essentially of" renders the claim open **only** for the inclusion of unspecified elements which do not materially affect the basic characteristics of the subject matter of the claim. Ex parte Davis 80 USPQ 448, 450 (PatBdApp 1948).

Further, the term "integral" does not require a unitary one-piece structure. In re Kohno, 391 F.2d 959, 157 USPQ 275 (CCPA 1968); In re Larson, 340 F.2d 965, 144 USPQ 347 (CCPA 1965).

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
